The R750 is based on the latest Wi-Fi 6 standard and bridges the performance gap from ‘gigabit’ Wi-Fi to ‘multi-gigabit’ Wi-Fi in support of the insatiable demand for better and faster Wi-Fi. The R750 is the first Wi-Fi 6 AP to be certified by Wi-Fi Alliance as Wi-Fi CERTIFIED 6. As part of the Wi-Fi Alliance testbed, the R750 validates other devices for Wi-Fi CERTIFIED 6 interoperability.

The Ruckus R750 is our high-end dual-band, dual-concurrent Wi-Fi 6 AP that supports 8 spatial streams (4x4:4 in 5GHz, 4x4:4 in 2.4GHz). The R750, with OFDMA and MU-MIMO capabilities, efficiently manages up to 1024 client connections with increased capacity, improved coverage and performance in ultra-high dense environments.

The R750, with OFDMA, TWT and MU-MIMO capabilities, efficiently manages up to 1024 client connections with increased capacity, improved coverage and performance in ultra-dense environments. Furthermore, multi-gigabit Ethernet ensures the backhaul is not a bottleneck for full use of available Wi-Fi capacity.

Also, wireless requirements within enterprises are expanding beyond Wi-Fi with BLE, Zigbee and many other non-Wi-Fi wireless technologies. Enterprises need a unified platform to eliminate network silos. The Ruckus AP portfolio is equipped to solve these challenges through wireless convergence.

The R750 has built-in IoT radios with onboard BLE and Zigbee capabilities. In addition, the R750 is a converged access point that allows customers to seamlessly integrate any new wireless technologies with our USB port.

The R750 addresses the increasing client demands in transit hubs, auditoriums, conference centers, and other high traffic indoor spaces. It is the perfect choice for data-intensive streaming multimedia applications like 4K video transmissions, while supporting latency sensitive voice and data applications with stringent quality-of-service requirements. The R750 is also easy to manage through Ruckus physical and virtual cloud management options.

The R750 when paired with the Ruckus Ultra-High-Density Technology Suite found only in the Ruckus Wi-Fi portfolio, dramatically improves network performance through a combination of patented wireless innovations and learning algorithmsthat includes:

- **Airtime Decongestion**: Increases average network throughput in heavily congested environments
- **Transient Client management**: Reduces interference traffic from unconnected Wi-Fi devices
- **BeamFlex+ Antennas**: Extended coverage and optimized throughput with patented multi-directional antennas and radio patterns

Whether you are deploying ten or ten thousand APs, the R750 is also easy to manage through Ruckus’ physical and virtual management options.

Access Point Antenna Pattern

Ruckus’ BeamFlex+ adaptive antennas allow the R750 AP to dynamically choose among a host of antenna patterns (over 4,000 possible combinations) in real-time to establish the best possible connection with every device. This leads to:

- Better Wi-Fi coverage
- Reduced RF interference

Traditional omni-directional antennas, found in generic access points, oversaturate the environment by needlessly radiating RF signals in all directions. In contrast, the Ruckus BeamFlex+ adaptive antenna directs the radio signals per-device on a packet by-packet basis to optimize Wi-Fi coverage and capacity in real-time to support high device density environments. BeamFlex+ operates without the need for device feedback and hence can benefit even devices using legacy standards.

Figure 1. Example of BeamFlex+ pattern

Note: The outer trace represents the composite RF footprint of all possible BeamFlex+ antenna patterns, while the inner trace represents one BeamFlex+ antenna pattern within the composite outer trace.

Indoor Wi-Fi 6 (802.11ax) Access Point for Ultra-Dense Environments

**Wi-Fi**

**Wi-Fi Standards**
- IEEE 802.11a/b/g/n/ac/ax

**Supported Rates**
- 802.11ax: 4 to 2400 Mbps
- 802.11ac: 6.5 to 1732 Mbps
- 802.11n: 6.5 to 600 Mbps
- 802.11a/g: 6 to 54 Mbps
- 802.11b: 1 to 11 Mbps

**Supported Channels**
- 2.4GHz: 1-13
- 5GHz: 36-64, 100-144, 149-165

**MIMO**
- 4x4 SU-MIMO
- 4x4 MU-MIMO

**Spatial Streams**
- 4 for both SU-MIMO & MU-MIMO

**Radio Chains and Streams**
- 4x4:4

**Channelization**
- 20, 40, 80, 160/80+80MHz

**Security**
- WPA-PSK, WPA-TKIP, WPA2 AES, WPA3, 802.11i,
  Dynamic PSK, OWE
- WIPS/WIDS

**Other Wi-Fi Features**
- WMM, Power Save, Tx Beamforming, LDPC, STBC,
  802.11r/k/v
- Hotspot
- Hotspot 2.0
- Captive Portal
- WiSp

**RF**

**Antenna Type**
- BeamFlex+ adaptive antennas with polarization diversity
- Adaptive antenna that provides 4,000+ unique antenna patterns per band

**Antenna Gain (max)**
- Up to 3dBi

**Peak Transmit Power (Tx port/ chain + Combining gain)**
- 2.4GHz: 26dBm
- 5GHz: 28 dBm

**Frequency Bands**
- ISM (2.4-2.484GHz)
- U-NII-1 (5.15-5.25GHz)
- U-NII-2A (5.25-5.35GHz)
- U-NII-2C (5.47-5.725GHz)
- U-NII-3 (5.725-5.85GHz)

**5GHz RECEIVE SENSITIVITY (dBm)**

**PERFORMANCE AND CAPACITY**

**Peak PHY Rates**
- 2.4GHz: 1148 Mbps
- 5GHz: 2400 Mbps

**Client Capacity**
- Up to 1024 clients per AP

**SSID**
- Up to 31 per AP

**RUCKUS RADIO MANAGEMENT**

**Antenna Optimization**
- BeamFlex+
- Polarization Diversity with Maximal Ratio Combining (PD-MRC)

**Wi-Fi Channel Management**
- ChannelFly
- Background Scan Based

**Client Density Management**
- Adaptive Band Balancing
- Client Load Balancing
- Airtime Fairness
- Airtime-based WLAN Prioritization

**SmartCast Quality of Service**
- QoS-based scheduling
- Directed Multicast
- L2/L3/L4 ACLs

**Mobility**
- SmartRoam

**Diagnostic Tools**
- Spectrum Analysis
- SpeedFlex

PLEASE NOTE: When ordering Indoor APs, you must specify the destination region by indicating -US, -WW, or -Z2 instead of XX. When ordering PoE injectors or power supplies, you must specify the destination region by indicating -US, -EU, -BR, -CN, -IN, -JP, -KR, -SA, -UK, or -UN instead of -XX.

For access points, -Z2 applies to the following countries: Algeria, Egypt, Israel, Morocco, Tunisia, and Vietnam.

CommScope pushes the boundaries of communications technology with game-changing ideas and ground-breaking discoveries that spark profound human achievement. We collaborate with our customers and partners to design, create and build the world’s most advanced networks. It is our passion and commitment to identify the next opportunity and realize a better tomorrow. Discover more at commscope.com
