HOSPITALITY
Give your guests a better network experience
ENHANCING THE CONNECTED GUEST EXPERIENCE

Today’s business and leisure travelers are more tech savvy than ever and expect high-speed Internet connectivity for their smart devices everywhere. 83 percent of hotel guests take the time to report a bad Wi-Fi experience, and 36 percent won’t rebook if they had one. If your guests can’t get a fast, reliable Internet connection, they will not likely come back. Ruckus’s wired and wireless solutions are the gold standard for hoteliers worldwide.

ONE NETWORK FOR ALL CONVERGED SERVICES

Ruckus high performance access points and Ruckus ICX™ switches enable hoteliers to deploy a single and reliable network infrastructure to concurrently support essential business applications, such as:

- Tiered High-Speed Internet Access (HSIA)
- Point-of-sale terminals
- IP-based Video on Demand (VOD)
- Back office and service optimization services
- Voice over IP (VoIP)
- Digital signage and kiosks
- In-room IP-enabled devices of all kinds

UNMATCHED MULTIMEDIA SUPPORT

IP-based video streaming, voice communications, and other multimedia applications such as digital signage are quietly becoming essentials. Ruckus Smart Wi-Fi is purpose-built with patented adaptive antenna technology and traffic engineering technologies to uniquely classify, schedule, prioritize, and optimize latency-sensitive multi-media traffic to ensure optimal network performance for guests and hotel staff.
“Ubiquitous, fast, and reliable broadband wireless is now one of the main criteria for selecting a hotel in today’s mobile world. The innovations Ruckus has made in the area of adaptive Wi-Fi signaling to solve important Wi-Fi range and reliability problems have empowered us to truly redefine the guest experience.”

SIMPLER NETWORKS FOR THE AGILE HOTELIER

With the changing business requirements of the hotel environment, networks must be easy to deploy and manage. In hotel deployments, switch stacking can dramatically minimize the time and costs dedicated to network management, and enable a simplified, scalable architecture with high network performance. When stacked, multiple switches are managed as a single switch and their resources pooled. With options to increase network capacity and mix different switches together, hoteliers can grow their networks as necessary while keeping management simple.

FLEXIBLE AND SCALABLE NETWORKING

A fabric design will deliver higher scalability and increased network visibility while reducing network operations costs. The Ruckus Campus Fabric is highly reliable, based on a centralized controller switch with redundant load balancing links that shares network services and capabilities with other switches in the fabric network. Switches that are deployed anywhere in the network by Hotel IT staff are automatically provisioned with zero-touch deployment. With a single point of management, troubleshooting and adding capacity are much easier, and uptime is improved.

Results: 30 MacBook Pro x 4 Test pair per client

RUCKUS SMART WI-FI OUT-PERFORMS ALL OTHER 802.11AC AND 802.11N WIRELESS ACCESS POINTS

Ruckus Smart Wi-Fi APs consistently outperformed all devices under testing (DUTs), taking top marks in almost every test scenario.
MODERNIZING THE NETWORK COST-EFFECTIVELY

Hotels are constantly challenged to keep up with expanding multimedia services that have become the standard for guests. Ruckus ICX Switches lead in delivering the best performance at a lower price point, and support multimedia services for years to come.

INNOVATION WITH MULTI-GIGABIT TECHNOLOGY

Where speed is needed, Ruckus is optimized by design for the latest Wi-Fi performance standards with Multigigabit solutions (802.3bz, 2.5 Gigabit). Ruckus not only provides the industry leading in-room access solutions for hotel guests, but also provides the ideal Wi-Fi and Networking solution for areas of the hotel where large numbers of people congregate such as conference centers or business meeting areas. These areas of the hotel require special attention to ensure guests can connect their devices and receive the speeds they need. Ruckus has the ideal solution that combines the R720 access point and the Ruckus ICX 7150 Z-Series switch to ensure Multigigabit support and deliver the full capabilities of 802.11ac Wave 2 to the most users and devices.

The R720 AP provides the highest Wi-Fi performance available today with an upgraded Multigigabit Ethernet (2.5 GbE) port and 4x4:4 802.11ac Wave 2. The Ruckus ICX 7150 Z-Series stackable switch is designed specifically to complement the R720 access point with Multigigabit Ethernet ports and industry leading PoE power budget, including PoE, PoE+ and PoH (Power over HDBaseT) up to 90 Watts per port. The combination of the R720 and ICX 7150 Z-Series ensure data is transmitted at the full potential of the Wave 2 standard to support even the highest density and most demanding areas and services of your hotel.

CONVERGED WIRED-WIRELESS MANAGEMENT

SmartZone network controllers simplify network set up and management, enhance security, minimize troubleshooting and ease upgrades of Ruckus access points and switches.

It doesn't stop there. Whether hoteliers are deploying complex multi-geo networks or partners are delivering multi-tier managed networking services, SmartZone network controllers deliver the scale, flexibility and openness to support the most sophisticated deployment scenarios.
**RUCKUS SMART WI-FI DELIVERS HOSPITALITY’S MOST FLEXIBLE DEPLOYMENT OPTIONS**

- In-room DOCSIS or Ethernet Wi-Fi wall switch
- Improved Wi-Fi for mobile devices
- Reliable indoor meshing
- Reliable, dual-band outdoor APs
- Long-distance stacking
- Single point management
- IoT Application Support

Hsia, Converged Services, ip vod, voip, pos, Guest Networking, Service Optimization, Back Office Administration, Digital Signage
Like many hotels around the world, La Quinta was experiencing a fundamental change in guest behavior and wireless usage patterns. Hotel guests wanted more control over their online experience with the ability to access, view and display their own content anywhere within the hotel. With more than 84K guest rooms, hundreds of hotels and 9m loyalty members, La Quinta is the fastest growing principal select-service hotel primarily serving the midscale/upper-midscale segments around the world. La Quinta committed to delivering guests an online experience that exceeded their experience at home.

To fill this tall order, a best-in-class wireless network architecture is no longer negotiable. Essential to the massive project was designing and deploying a smart Wi-Fi infrastructure capable of automatically adapting Wi-Fi signals and channel assignments to guest devices to achieve the best possible wireless performance and reliability. A better utilization of the bandwidth-rich 5GHz band became a key requirement along with the ability for wireless network to deal with lower-powered smart mobile devices. The multi-device guest required a wireless service that provides for flicker-free streaming video and multimedia content from a myriad of different devices.

La Quinta selected and standardized on an advanced wireless network infrastructure based on Ruckus Smart Wi-Fi products and technologies. With Ruckus, La Quinta would be able to deliver stronger signal coverage to every corner of every property, more reliable Wi-Fi connections that would keep guests connected and elegant management that kept things simple for remote wireless administrators. According to La Quinta, the results have been nothing less than spectacular with guests raving about the stability and performance of the new Smart Wi-Fi services. With patented smart antenna array technology integrated into Ruckus Smart Wi-Fi access points,

La Quinta could increase wireless performance, capacity and range with fewer access points for each property compared to competitive alternatives. This translated into lower capital and operational expense and the need for IT staff at every property. With a Ruckus Smart Wi-Fi infrastructure now in place, La Quinta guests are now living the dream with an online wireless experience that mirrors what they have at home—something every hotel guest expects and every hotel craves. Ruckus Wireless delivers.

Great hotels are choosing Ruckus network solutions to solve challenges that stump competitors

<table>
<thead>
<tr>
<th>Problem</th>
<th>Ruckus Network Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spotty Coverage</td>
<td>High-gain smart antenna system extends coverage by two- to four- times, requiring fewer APs per hotel</td>
</tr>
<tr>
<td>Guest Networking</td>
<td>Intuitive, browser-based facility lets any guest-facing staff generate a unique and timed Wi-Fi guest pass in less than 60 seconds</td>
</tr>
<tr>
<td>Consistent Wireless HSIA For Guests</td>
<td>Patented adaptive antenna technology and smart antenna array technology within every Ruckus Smart Wi-Fi access point ensures stable client connectivity and mitigates packet loss to ensure the highest performance possible</td>
</tr>
<tr>
<td>Converged Services Over Wi-Fi</td>
<td>Provides up to 32 discrete WLAN networks that can be used to concurrently support IP-based video, voice, HSIA, digital advertising, and back office applications</td>
</tr>
<tr>
<td>Complex, Cumbersome Deployment With Ease</td>
<td>Long-range, high-gain access points require fewer nodes to cover a given area and allow Wi-Fi services to be offered in areas where Ethernet cabling doesn't exist or can't be pulled, through advanced wireless meshing</td>
</tr>
<tr>
<td>Voice Over Wi-Fi</td>
<td>Advanced Wi-Fi signal controls and quality of service technology provide superior support of IP-based VoIP phone and Wi-Fi badges</td>
</tr>
<tr>
<td>IP-based Video Support Without New Wiring</td>
<td>Dual-band 802.11ac delivers picture-perfect streaming of high-definition, IP-based video over the same network used to provide HSIA</td>
</tr>
<tr>
<td>Unified Network</td>
<td>Wired, Wireless and IoT networks seamlessly integrated and managed together centrally</td>

COMPLETE PORTFOLIO FOR HOSPITALITY

ICX 7150 Switches
Multigigabit Access 8/10/12/24/48 ports L2/L3 PoE & fiber switches for in-room or IDF deployment with up to 8x 10GbE uplinks

ICX 7250 Switches
Gigabit Access 24/48 port L2/L3 PoE switches for IDF deployment with 8x 10GbE uplinks and redundant external power option

ICX 7450 Switches
Gigabit Access/Aggregation 24/48 port L2/L3 PoE & Fiber switches for IDF deployment with 10/40 GbE uplinks and redundant hot-swap power and fans

ICX 7650 Switches
Multigigabit Access/Aggregation 24/48 port L2/L3 PoE & fiber switches for IDF/MDF deployment with 10/40/100 GbE uplinks and redundant hot-swap power and fans

ICX 7850 Switches
High-Performance Core 32/48 port 10/25/40/100 GbE speed, L2/L3 switches for MDF deployment with redundant hot-swap power and fans

SmartZone Network Controller
Scalable network controllers for Wi-Fi control and converged wired-wireless management. Physical or virtual appliance

SmartCell Insight
Data Analytics and Reporting

Ruckus Fiber Backpack
Purpose-built, fiber-to-copper Ethernet media converter accessory provides a pluggable fiber interface for Ruckus H510 wall-mounted APs for fiber to the room deployment
