

RUCKUS CLOUDPATH™ ENROLLMENT SYSTEM

A GREAT FIT FOR PRIMARY EDUCATION

COMMSCOPE®

First Things First.

What is Cloudpath Enrollment System?

Ruckus Cloudpath Enrollment System is software/software as a service (SaaS) that delivers secure network access for BYOD, guest users and IT-owned devices. It streamlines device onboarding for students, faculty, staff and guests. Users connect their devices to the network quickly and easily with intuitive self-service workflows. IT teams see a dramatic decline in trouble tickets related to network access.

Built-in safeguards ensure that every connection is secure: powerful encryption for wireless data in transit, policies for role-based network access, certificate-based authentication, an up-front posture check with remediation and more. Cloudpath software works with any vendor's wired and wireless infrastructure. You can deploy on-premises in a virtualized environment or as a cloud-based service.

Why is Cloudpath Enrollment System such a great fit for primary education?

Students typically arrive with a wave of new devices when school starts, and another wave hits after the holidays. IT can spend a lot of time getting those devices online. Self-service, automated network onboarding is essential to keeping IT teams from becoming inundated.

With Cloudpath, IT teams can proactively email students before school starts to go through the Cloudpath onboarding process. When students arrive at school, they've already pre-boarded to connect to the network seamlessly. Without a system for secure network onboarding in place, students are more likely than most users to experience network access issues. Cloudpath solves that problem and allows students to focus on learning. Administrators ensure that precious learning minutes are not lost.

Why is Cloudpath Enrollment System such a great fit for primary education?

(continued)

Cloudpath software works with a school's existing wired/wireless network infrastructure, so there is no need to swap your network out to deploy—and no need to wait for a refresh cycle. The product also integrates with any product that can consume its APIs. In addition, special technology integration with Google Chromebooks™ makes onboarding them particularly easy. Cloudpath also integrates tightly with leading web filtering products from Lightspeed Systems® and iBoss®. It allows these products to filter encrypted content to protect students from harmful or inappropriate content on the web.

What proof can you offer that Cloudpath is a great fit for primary education?

The best proof points come from our satisfied customers. Numerous schools around the world have successfully deployed Cloudpath Enrollment System. Let's look at a few customer quotes.

“Cloudpath gives us an easy way to attach devices to our wireless network securely, without manual intervention from IT.”

Chris Alger, Systems Engineer
Forest Hills Public Schools
Grand Rapids, Michigan

“Cloudpath is an excellent security management tool that works, allowing IT to easily keep the network secure.”

David Henderson, IT Director
Victor Central School District
Rochester, New York

“Technology is now woven into every student’s life. If we didn’t embrace BYOD, we would be ignoring huge educational opportunities. As a district, we have chosen to take advantage of the situation and to extend the learning environment in new ways. This means our BYOD network is mission critical. The ability for us to act upon this opportunity is based on our wireless infrastructure and Cloudpath’s ability to easily connect users.”

Neal Shelton, Network Engineering Supervisor

Fairfax County Public Schools

Fairfax County, Virginia

“Cloudpath has provided shared responsibility for device authentication between our IT department and faculty. Now the faculty can troubleshoot and provide access as needed.”

Bryant Wong, Chief Technology Officer

Summit Public Schools

California and Washington State

Where can I learn more?

You may be just starting to consider deploying a platform for secure network access, or maybe you're farther along in the consideration process. Regardless, we invite you to **learn more at ruckusnetworks.com/secureaccess**. There you will find a wide range of materials about Cloudpath Enrollment System, including written case studies for customers quoted in this document. When you're ready, you can even request a live online product demo.

CommScope (NASDAQ: COMM) helps design, build and manage wired and wireless networks around the world. As a communications infrastructure leader, we shape the always-on networks of tomorrow. For more than 40 years, our global team of greater than 20,000 employees, innovators and technologists has empowered customers in all regions of the world to anticipate what's next and push the boundaries of what's possible.
